PROFESSIONAL SUMMARY

Ingeniero en Informática con más de 4 años de experiencia en desarrollo full stack, especializado en diseño de APIs REST, arquitecturas escalables y despliegue en la nube. Experiencia en equipos ágiles con contacto directo con clientes, desde el relevamiento de requerimientos hasta la entrega del producto. Me destaco por mi orientación a resultados, resolución de problemas complejos y compromiso con la calidad del código.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Koovra (May 2025 – Present)

- Developed web applications using .NET Core and AngularJS within scalable architectures, actively participating in technical design decisions.
- Implemented automated testing and best practices (SOLID, clean code) that reduced production defects.
- Optimized SQL Server databases through query tuning and schema design to improve overall performance.
- Developed Python scripts for process automation, eliminating recurring manual tasks for the team.

Full Stack Developer – Circo Studio (Jan 2022 – May 2025)

- Built frontend and backend solutions for multiple clients using Angular, React, .NET, Java, and Python.
- Built a reusable Angular component library that standardized development and reduced feature implementation time.
- Integrated third-party APIs and relational/non-relational databases into client production applications.
- Participated in client meetings for requirements gathering, scope definition, and deliverable validation.
