Professional Summary

Computer Engineer with 4+ years of experience in full-stack development, specializing in REST API design, scalable architectures, and cloud deployment. Experienced working in agile teams with direct client contact, from requirements gathering through product delivery. Results-driven, with a focus on solving complex problems and maintaining code quality.

Professional Experience

Full Stack Developer – Koovra

May 2025 – Present

- Developed web applications using .NET Core and AngularJS within scalable architectures, contributing to technical design decisions.
- Implemented automated testing and best practices (SOLID, clean code), reducing production defects by approximately 20%.
- Optimized SQL Server databases through query tuning and schema redesign, improving response times by up to 30%.
- Built Python scripts to automate processes, saving the team approximately 4-5 hours of manual work per week.

Full Stack Developer – Circo Studio

January 2022 – May 2025

- Developed frontend and backend solutions for multiple clients using Angular, React, .NET, Java, and Python.
- Integrated external APIs and relational/non-relational databases into production applications, expanding the functional scope of delivered products.
- Participated in client meetings for requirements gathering, scope definition, and deliverable validation, ensuring alignment between client expectations and team deliverables.

Projects

Papyrus — CV-to-job compatibility analyzer built with a microservices architecture: fit score, missing skills, and LLM-generated suggestions (Next.js, Go/Gin, Python/FastAPI, LangChain, Gemini, Supabase/PostgreSQL with RLS). github.com/tomasgoico7/papyrus

El Prode de la Gambeta — World Cup 2026 prediction pool platform with private groups, phase-based predictions, and real-time rankings (Next.js, NestJS, Prisma, PostgreSQL, Docker, Azure). github.com/tomasgoico7/prodeMundial

Personal Portfolio — Bilingual (ES/EN) personal site with light/dark mode and animations (Next.js, TypeScript, Tailwind CSS, Framer Motion). github.com/tomasgoico7/portfolio

Technical Skills

Frontend: Angular, React, Next.js, TypeScript, Tailwind, Bootstrap, CSS

Backend: .NET Core, Node.js, NestJS, Spring Boot, Python (FastAPI), Java, Go

Data: SQL Server, MongoDB, PostgreSQL

DevOps: Docker, Azure, AWS, Git / GitHub

AI: OpenAI API, LangChain, RAG, Prompt Engineering, GitHub Copilot, Cursor, Claude Code, Vector DBs

Education

Computer Engineering

Universidad Nacional de La Matanza, 2018 – 2025

Information Technology Technician

Colegio Monseñor Tomás Solari, 2011 – 2018

Languages: Spanish (native) | English – Upper Intermediate (B2)
